4 Our Approach to ►►► BUILDING DESIGN

At The JDI Group, we specialize in designing municipal buildings that are functional, aesthetically pleasing, and sustainable. Our designs aim to serve the community effectively while reflecting its unique character and values.

Our Process

- 1. User-Centered Planning:** We design municipal buildings with the end users in mind, ensuring spaces are functional, accessible, and adaptable to evolving community needs.
- 2. Regulatory Expertise:** Our team navigates complex zoning laws, building codes, and ADA requirements to streamline approvals and ensure compliance.
- 3. Technology Integration:** We incorporate smart building systems, advanced security measures, and energy-efficient solutions to enhance operational performance.
- 4. Flexibility for Growth:** Our designs anticipate future expansion needs, allowing for easy modifications and scalability as municipal services evolve.
- 5. Seamless Project Coordination:** We collaborate with city planners, engineers, and contractors to ensure smooth project execution, minimizing delays and cost overruns.

Success Stories

- City of Maumee - Cold Storage Building
- Washington Township - Fire Station
- Lucas County Commissioners - Clerk of Courts
