6 Our Approach to ►►► SITE INFRASTRUCTURE/SURVEY

At The JDI Group, we provide comprehensive site infrastructure survey services that lay the foundation for successful project planning and execution. Our commitment to precision and accuracy ensures that every project starts with a solid understanding of the site conditions.

Our Process

- 1. Comprehensive Data Collection:** We use state-of-the-art surveying technology to gather detailed and accurate data about the site, including topography, boundaries, and existing infrastructure.
- 2. Innovative Solutions:** Our team of experienced surveyors and engineers employs innovative techniques to analyze the data and provide actionable insights for design and construction.
- 3. Regulatory & Permitting Assistance:** We help navigate local, state, and federal regulations, ensuring compliance with zoning, environmental, and land use requirements.
- 4. Seamless Integration with Design Teams:** Our survey data seamlessly integrates with architectural and engineering plans, reducing design conflicts and expediting project timelines.
- 5. Detailed Reporting:** We deliver comprehensive reports and high-quality visualizations that support informed decision-making and precise project planning.

Success Stories

- City of Maumee - Maple Street
- Subdivision Surveying
- Ohio Department of Rehabilitation and Corrections
